### **DETAILED ACTION**

This responds to Applicant's Request for Continued Examination filed 3/3/2011. Claims 1-8, 15, 33, and 35-40 are pending in this Application.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/3/2011 has been entered.

#### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 3/3/2011 was filed after the mailing date of the Notice of Allowance on 12/16/2010. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Allowable Subject Matter***

3. Claims 1-8, 15, 33, and 35-40 are allowed.

4. The following is an examiner's statement of reasons for allowance: the prior art of record neither anticipates nor renders obvious Applicant's claimed invention as

amended in Claims 1, 15 and 33. There are inventions in the domains of responsible gambling, safe gaming, and gambling insurance yet none claim Applicant's claimed invention wherein during a game a wager amount is checked for a triggering condition for presenting a confirmation message to be displayed before the player accepts the wager wherein the amount selected is greater than a predetermined amount not the minimum wager amount for the game to be played and a signal is initiated by the player after display of the confirmation message that the amount wagered is the amount the player desires to wager . The closest prior art in safe gaming is U.S. Patent Pub. No. 2001/0031663 to Johnson wherein Johnson discloses a system in which a player's activities are tracked such that the system "interjects alerts to the individual when reaching loss limits, time limits, or when changes in gambling behavior signal an issue ..." [0011]. The system "also provides real time alerts when a player approaches thresholds or limits of the parameters set for him/her while gambling or when player exhibits significant changes in individual gambling behavior" ([0013]). However, Johnson is silent on the specific criteria to trigger the alert as claimed by Applicant. U.S. Patent Pub. No. 2003/0190944 to Manfredi et al. discloses a system of self-limit play (Abstract) wherein limits can be predetermined prior to game play of which a player is presented a displayed confirmation as to his/her settings (Fig. 5). However, Manfredi is silent on a confirmation as claimed by Applicant which would occur during play to momentarily interrupt play. Manfredi's confirmation message operates differently i.e., to turn self-imposed limits on or off rather than during play to warn or advise of a wagered amount as claimed. U.S. Patent Pub. No. 2002/0073021 to Ginsberg helps clients

control risk ([0062]) and issues warnings subject to criteria ([0063]) yet upon further thought and consideration the Examiner believes the warnings are based on accumulated wagering or losses ([0062]) or, a loss rate, rather than on an individual wager amount being greater than a predetermined amount as claimed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
